SUMMARY

Junior Software Engineer with 1+ year of experience in delivering scalable and efficient software solutions. Proven track record of contributing to large applications with a focus on cloud technologies and automation. AWS Certified Developer, eager to join a fast-paced, stimulating environment that drives me and lets me leverage my personable personality.

WORK EXPERIENCE

Software Engineer Intern - Spring Software

Uxbridge, UK

🔧 Unix servers Java AWS S3 TypeScript MySQL

📅 Jun 2024 – Sep 2024

- Developed a video interview feature for clients, boosting user engagement and providing a seamless interviewing process.
- Utilized AWS S3 buckets to securely store candidates' personal data, implementing encryption to ensure compliance with data protection regulations.
- Improved Next.js application performance by optimizing page load times and reducing server response latency by 30%.
- Collaborated with a team of 4 to design and engineer pre-interview audio and video recording tests, ensuring the functionality and quality of candidate recordings.

Student Learning Assistant - University of Middlesex

Hendon, London 📍

🔧 Java TypeScript HTML/CSS MongoDB

📅 Sep 2022 – Mar 2023

- Assisted professors by streamlining administrative tasks and developing resources, enhancing overall teaching efficiency and effectiveness.
- Improved course performance by providing personalized tutoring and feedback, resulting in a 10% increase in average student grades.
- Facilitated peer learning and collaboration by organizing study groups and review sessions, leading to a 22% increase in student participation.

PROJECTS

UK Election predictor, Machine Learning

Data Visualizer

🔧 AWS S3 AWS Lambda Sagemaker WebSocket DynamoDB

🔗 barun_g/2024-Uk-Election

- Developed a website to showcase historical general election data (1918-2019) with machine learning predictions and sentiment analysis using News API.
- Built the frontend for data visualization and analysis with TypeScript, leveraging serverless technology for scalability.
- Implemented real-time updates with WebSocket and managed infrastructure using AWS SAM or Serverless framework on AWS Educate.

Price Comparison App, Web Scraping

Full Stack App

🔧 Spring Boot EJS Hibernate SQL JSoup/ Selenium HTML/CSS JUnit

🔗 barun_g/price_comparison

- Developed a robust backend with Java and Spring, using JSoup for web scraping and Hibernate for optimized database interactions.
- Enhanced database interactions and performance by integrating Hibernate, streamlining data storage and retrieval processes for improved system efficiency.
- Created a user-friendly frontend with HTML, CSS, JavaScript, and Node.js, and ensured high code quality through Maven, JUnit, and Mocha Chai testing.

SKILLS AND ACHIEVEMENTS

- Java, TypeScript, Python, C++, React, JavaScript, HTML/CSS, DynamoDB, AWS, Spring boot, RESTful API, Websockets
- Postman, Git/GitHub, JUnit, Docker, VS Code, IntelliJ, SQL (MySQL), Express.js NodeJs, Microsoft Power BI, Tailwind CSS

UX Design Research Augmented Reality(AR) Technology

Team Leader, Middlesex

🔧 Figma Miro Balsamiq

📅 February 2024

- Recognized by the professor for exceptional work on an AR UX project, achieving notable advancements in augmented reality design.

Won first place in Tier 3 of the British Universities' League

Badminton, England

📅 2022 - 2023

EDUCATION

Bachelor's degree in Computer Science

Middlesex University

📄 First Class

📅 Sept 2022 - June 2025

- Relevant Coursework included Data structures, Software engineering, Web development with Big data, Object Oriented programming, Security and Networking and application and System design group electives.
