EDUCATION

University of Middlesex

Expected May 2025

Bachelor of Science, Computer Science

- Key Modules - Object Oriented programming, Software Engineering, Advanced Web development with Big data, Computer Security and Networking, Introduction to Programming, UI/UX Design.

WORK EXPERIENCE

Software Engineer Intern - Spring Software

Aug 2024 – Sep 2024

- Collaborated with a team of 5 developers to create a video interview feature in response to long-standing client requests, enhancing user engagement and streamlining the interview process.
- Designed a secure storage system using AWS S3 with encryption for candidate data, ensuring full compliance with data protection regulations.
- Analyzed user data to improve candidate-employer matching, leveraging feedback and surveys to enhance the accuracy and effectiveness of the feature.
- Improved Next.js application performance by optimizing code and utilizing server-side rendering (SSR) techniques, reducing page load times and decreasing server response latency by **30%**.

Student Learning Assistant, Middlesex University

Sep 2022 – Mar 2023

- Streamlined administrative processes and developed tailored teaching resources, significantly improving overall teaching efficiency and classroom engagement.
- Delivered personalized tutoring sessions and in-depth feedback to students, leading to a measurable **10%** increase in average course grades.
- Spearheaded the organization of peer study groups and review sessions, enhancing collaborative learning and driving a **22%** rise in student participation and engagement.

Sales and Product Demonstrator, Fizz Experience

Jan 2022 - Sep 2022

- Demonstrated ability to work in a fast-paced environment by serving **100+** customers nightly, delivering prompt, accurate, and efficient service.
- Presented product features to customers, boosting visibility and encouraging informed purchasing decisions.
- Gathered customer feedback on new products, providing insights to improve goods and services.

PROJECTS

UK Election Predictor, Machine Learning

github.com/Data-Visualizer

- Created an interactive website to predict election outcomes by training a machine learning model on historical data (1918–2019) using AWS Sagemaker and storing data on AWS S3.
- Implemented WebSocket for real-time data updates and AWS Lambda for backend processing based on changes in DynamoDB, ensuring the site delivered timely information.
- Used serverless technology to solve scalability issues, resulting in an efficient frontend for data visualization.

Price Comparison App, Full stack app

github.com/Price-Tracker

- Built a robust backend using Java and Spring Boot, with JSoup for web scraping and Hibernate for efficient database interactions.
- Enhanced database performance by integrating Hibernate, optimizing data storage and retrieval.
- Ensured the functionality of the frontend by using JUnit and Mocha Chai for comprehensive testing.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Frameworks: Spring Boot, React.js, Node.js, Express.js, JUnit, Tailwind CSS

Certifications: AWS Certified Cloud Practitioner
